

Professional Summary

Security & GRC Analyst specializing in *PCI DSS (v4.0.1)*, *NIST CSF*, and enterprise risk management. Blends technical Cybersecurity controls—including server hardening, AI-assisted productivity tools, SIEM log analysis, and SQL/Python auditing—with a strong Business Analyst foundation to streamline risk assessments and translate complex compliance requirements. Proven track record of collaborating with cross-functional stakeholders in Fortune 500 environments to reduce configuration vulnerabilities by 40%, eliminate critical compliance gaps, and establish absolute audit readiness for Qualified Security Assessor (QSA) reviews.

PCI DSS v4.0.1 Compliance | Service Now | SharePoint | Security Audits & Assessments | SAQ Development & Scoping | Risk & Control Analysis | Vulnerability Management (Qualys, Rapid7) | Security Information and Event Management (SIEM) | Network Security | File Integrity Monitoring | Endpoint & Server Hardening | Kali Linux and Parrot Pen test Platforms | GRC Frameworks (NIST CSF, CIS, ISO) | Incident Documentation & Reporting | Data Analysis | Microsoft Hyper-V, VMware | Stakeholder Communication & Governance | Cybersecurity Defense & Countermeasures | Scrum/Agile Project Leadership

Professional Experience

Business Analyst | Remote

02/2025 – 12/2025

Humana | Louisville, KY 40258 / USA

- Increased intake request processing efficiency by 30% by streamlining intake assessments and development workflows for IT and security teams using Service Now, AI-assisted prompt workflows, and SharePoint automation tools.
- Aligned cross-functional security requirements and eliminated project miscommunications across teams, achieving 100% stakeholder consensus on security standards by leading virtual alignment sessions with EA Champions, technical teams, and executive stakeholders via Zoom.
- Established standardized best-practice guidelines and strengthened security postures across virtual infrastructure, reducing endpoint configuration errors by authoring technical documentation and deploying endpoint protection measures through Microsoft Hyper-V.
- Enhanced cross-departmental collaboration and incident resolution speed, improving incident tracking accuracy and stakeholder update cadence by leveraging an integrated suite of business tools including Service Now, SharePoint, Lucid-chart, Outlook, and Microsoft Teams.

Independent Professional Development & Certification | Remote

10/2023 – 02/2025

Louisville, KY 40258 / USA

- Maintained 100% compliance readiness across enterprise security standards by updating core regulatory knowledge to PCI DSS v4.0.1 and NIST Cybersecurity Framework standards through targeted framework analysis and relevant mapping tools.
- Accelerated vulnerability identification and risk prioritization, evaluating key security findings with high accuracy by completing specialized Qualys Vulnerability Management coursework and applying the platform in real-world assessment scenarios.
- Demonstrated advanced ethical hacking capabilities, executing simulated penetration tests across multiple target environments by applying Kali Linux, Metasploit, Wireshark, and Burp Suite during Certified Ethical Hacker (CEH) practical labs.
- Streamlined cross-functional project execution and sprint delivery improving team collaboration efficiency by earning the Certified Scrum Master (CSM) credential from Scrum Alliance.

Information Security Analyst (Consultant via Baxter Clewis) | Remote

10/2022 – 10/2023

Fortune 500 Consumer Appliance Manufacturer | Houston, TX / USA

- Accelerated non-compliant setting identification and resolution, decreasing overall remediation time by 30% by conducting rigorous security audits of Linux and Windows Server configurations to enforce PCI DSS compliance standards.
- Eliminated \$100,000 in potential regulatory non-compliance fines by identifying, addressing, and resolving critical gaps within the Windows Configuration Standard through targeted alignment with PCI DSS requirements.
- Achieved complete audit readiness for an upcoming Qualified Security Assessor (QSA) review by collaborating with a cross-functional consulting team to elevate client security controls for a Fortune 500 account.
- Demonstrated verified compliance posture, completing a comprehensive Self-Assessment Questionnaire (SAQ) by researching internal governance documents, applying industry guidelines, and executing a structured scoping plan.
- Mitigated session security risks and cut unencrypted traffic transmission by 35% by reconfiguring client-adjustable Remote Desktop Protocol (RDP) encryption settings to prevent unauthorized changes during timed sessions.

Work Experience

Technical Warehouse Contractor

10/2022 – 10/2023

United Parcel Service | Louisville, KY / USA

- Implemented patch management with Microsoft SCCM to keep laptops updated with the latest security patches, cutting average deployment time by 50% and reducing vulnerability exposure.
- Assessed and remediated configuration gaps on 15 servers by improving the organization's overall risk posture by reducing configuration-related vulnerabilities by 40%, as identified through vulnerability assessments and security audits.

Logistics Compliance & Safety Driver

09/2021 – 07/2022

T-Force Logistics | Tracy, CA / USA

- Assessed badge distribution to identify key personnel during entry/exit of the facility; preventing unauthorized visitors from being granted access to areas containing sensitive data.
- Supervised facility access controls and physical badge distribution logs for on-site personnel and visitors to prevent unauthorized entry into secure cargo warehouse areas.
- Audited incoming/outgoing freight manifests, reconciling delivery logs to establish an unalterable paper trail and maintain chain of custody for high-value client assets.
- Authorized site safety and environmental hazard mitigation procedures, leading to a 25% reduction in compliance discrepancies during quarterly safety reviews.

Operational Security & Compliance Driver (Starbucks)

01/2018 – 06/2021

Southwest Traders | Stockton, CA / USA

- Managed on-site point-of-delivery payment logs, maintaining strict confidentiality of customer transaction documents and physical invoice receipts in compliance with corporate privacy standards.
- Audited and processed invoice adjustments, refused shipments, and customer account credits, ensuring accurate audit trails, secure transaction logs, and error-free tracking via Microsoft Teams.
- Identified and masked sensitive data on over 500 invoices with 98% accuracy which maintained confidentiality of payment information.
- Partnered with customer accounts, sales teams, and corporate billing departments to investigate and resolve delivery discrepancies, maintaining a 90% resolution rate under tight timeline constraints.

Education & Certifications

Bachelor of Arts (BA), Eastern Kentucky University, Richmond, KY / USA

Google Cybersecurity Professional Certificate, Coursera <https://coursera.org/share/2932b95cdd5621d34e82cb659c929007>

Certified SOC Level 1 Analyst, Try Hack Me, <https://tryhackme.com/certificate/THM-FFPYE9ZGI3>

Qualys Vulnerability Management Detection & Response (VMDR), www.qualys.com

Certified Scrum Master in Agile (CSM) Scrum Alliance <https://www.scrumalliance.org/community/profile/imorrison6>

Cybersecurity Acceptance Specialist Program (CASP), BC Cybersecurity, Houston, TX / USA

Projects & Technical Skills

GitHub Portfolio: <https://github.com/Ivan2BMe/Google-Cybersecurity-Portfolio.git>

Compliance Frameworks: PCI DSS v4.0, NIST Framework, CIS Controls, ISO 27001, SAQ, PAT Workbook

Productivity & Documentation: Service Now, SharePoint, Microsoft Office 365 (Word, Excel, PowerPoint, Outlook, Publisher), LibreOffice (Draw, Impress, Writer, Calc). General knowledge of NIST, CIS, ISO, and SANS

Tools: Network Security, Python, Linux, Windows, SQL, VM, Qualys VMDR, SIEM tools & Playbooks

Business Analysis & AI Productivity: Generative AI tools and prompt engineering for Workflow Optimization & Documentation, Requirements Gathering, ServiceNow, SharePoint, Agile/Scrum Leadership

Remote Communications and Project Management: Zoom, Skype, Google Chat, Microsoft (Teams, OneNote), Basecamp, Slack, FileZilla, Remote Desktop Applications

Penetration Testing Tools: Kali Linux & Mint Cinnamon (Metasploit, Meterpreter, Burp Suite, Wireshark)

Additional Skills: Lucid, GIMP (GNU Image Manipulation Program), Fire Alpaca, Tech Smith Capture, Break Fix, Virus Removal, Host Gator & Shopify (Website Setup & Design, Implementation and Organization), Security Camera Installation, Setup and Monitor

Adopting new technology quickly and independently
